

VIDEO TRAINING RECORD		
VIDEO TITLE It Always Happens to the Other Guy	VIDEO ID NUMBER VST33V 00007	
<p style="text-align: center;"><b>KEY TEACHING POINTS OF THE VIDEO</b></p> <p>If you operate or work around any construction equipment, then you are the other guy. Safety is not a matter of luck, it is a matter of law. Accidents are mistakes that result from carelessness, lack of awareness, lack of knowledge or the attitude that accidents happen to the other guy. Keep equipment in good working order to prevent accidents from occurring due to mechanical failure, check hydraulics at the end of each day, lubricate the equipment whenever necessary and fill the fuel tank at the end of the day. Before getting off the machine make sure the brakes are set and the bucket, bowl, or blade is lowered. Always use hand holds whenever climbing on or off the equipment using the 3 point contact method. Always contact underground utility locator service before beginning any excavation. When backing up, don't just rely on the reverse alarm to warn others around you that you are moving. Look behind you first. When moving down a slope with a full load, back down carefully and keep the loaded bucket as low as possible for optimum visibility and good stability. When operating heavy equipment on roadways, it is required that all heavy equipment have the standard slow moving vehicle sign on the machine. The safest method of loading and unloading heavy equipment being transported on a trailer is to back onto the trailer and drive off, always using the ramp. The best cure for an accident is to operate your equipment safely so you can prevent the accident from happening.</p>		
<b>TEST</b>		
<b>QUESTION</b>	<b>ANSWERS</b>	
	<b>TRUE</b>	<b>FALSE</b>
1 Safety is a matter of luck, not law.		
2 Accidents are mistakes that are the result of carelessness, lack of awareness, lack of knowledge or happen to the other guy.		
3 The law requires that all heavy equipment must have the standard slow moving vehicle sign when operating on roadways.		
4 The safest method of loading and unloading heavy equipment onto a trailer for transport is to drive the equipment on and back it off.		
5 The best cure for an accident is to operate your equipment safely so you can prevent the accident from happening.
